3058Y

Note: 3058 carpet covered areas are made in Finland and subject to a different flame retardant standard

FLAME RETARDANCY

The degree of flame retardancy varies throughout our range of gymnastic matting. All mats are manufactured with flame retardant PVC covers. All mats incorporate either chipfoam, expanded polyethylene foam or a combination of both. The following mats are manufactured to BSEN 12503-1:2001 and flame retardant to BS 1892-3:2003 * Deluxe Mats * Multi Purpose Mats * Agility Mats * Club Judo Mats * Tournament Judo Mats

SAFETY MATS - Flame retardant covers

Constructed with standard foam inner and fully sewn, flame retardant PVC coated fabric outer covers, complete with toggles, carrying handles and anti-slip panels, these mattresses are available in a variety of different sizes and thicknesses. Mattresses with flame retardant foam inner are also available at extra cost.

High jump landing areas suitable for use in schools. These are rectangular modules (without post cut outs), comprising several mats which are held together by a PVC cover. All feature an extra strong design with a heavy duty, UV stabilised PVC cover. Secondary modules have the option of a spikeproof wearsheet to protect them from spiked athletic shoes, which is reversible to help prolong its life. When the landing area is not being used, the individual mats can be used for indoor PE and gymnastics.

- Special Offer

HANDLING AND STORAGE

Most damage occurs to mats as they are being taken from, or returned to storage, or when other equipment is placed on top of them. This must be avoided wherever possible. Mats should be stored flat where possible, or using a suitable mat trolley. Do not store mats next to hotwater pipes or radiators, as this will cause premature ageing of the foam inners and covers.

FLAME RETARDANCY

The degree of flame retardancy varies throughout our range of gymnastic matting. All mats are manufactured with flame retardant PVC covers. All mats incorporate either chipfoam, expanded polyethylene foam or a combination or both. The following mats are manufactured to BSEN 12503-1:2001 and flame retardant to BS 1892-3:2003 * Deluxe Mats * Multi Purpose Mats * Agility Mats * Club Judo Mats * Tournament Judo Mats

GYM/JUDO MATS - Flame retardant covers

Lightweight Mats - Constructed using flame retardant PVC coated fabric bonded to the top and sides of a lightweight foam inner together with a nylon mesh reinforced latex anti-slip base; these are excellent for Primary and Secondary school use. Easy to handle and store. These mats are also available with Velcro sides to link the mats together to form a matting area. Available in Blue as Standard as well as Red.
