

Evans of Longton has the skills and expertise to refurbish existing sports halls or design and furnish new facilities. Our own designers will listen carefully to your brief, recommend and supply moving equipment and fitments, line mark the unit for any combination of indoor sports court or markings, sub-divide floor space with nets, boarded partitions and more.

All our work meets the highest standards - health & safety regulations, local authority inspection and approval, sports bodies' criteria, in fact everything that you would expect from professionals backed by 166 year's experience.

Just get in touch with us today for initial discussions on where Evans can help with your sports hall needs.

## BASKETBALL GOALS

We offer a range of basketball goals to suit your individual sports hall design. This includes both retractable roof mounted and wall mounted models.

Conforming to the new European standards, the goals are manufactured from heavy gauge tubular steel and complete with solid steel hinges. The backboards are available in a choice of timber or perspex with reinforced steelwork frames for added strength and security. Supplied with heavy duty solid rings and regulation nets, the goals have an adjustable height option, offering between 3.05m and 2.6m ring heights. Optional extras include slam dunk rings and for added player protection, rubber protection padding kits.

In addition the retractable roof mounted option offers:

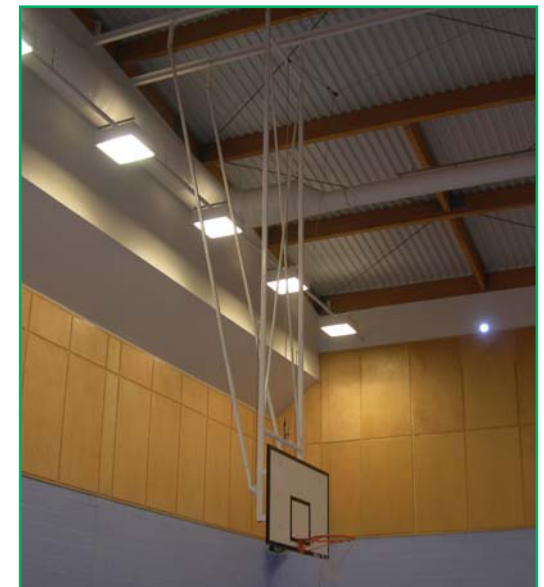

- Electric or manual operation
- Rearward or forward folding
- Optional crash protection device to prevent falling if cables damaged
- Heavy duty winch operates dual lifting cables

The wall mounted model:

- Available in hinged, fixed projection or flat fixed options
- Matchplay goals available up to 4.5m projection
- Practice goals fixed or hinged for up to 1.5m projection
- Hinged goals option have easy floor-level folding operation

**Note: Design of support steelwork for these goals can vary, depending upon length of projection.**

## TRACKWAY AND NETTING

Ideal for all types of sports activity including cricket, golf and archery, we supply and install trackway designed specifically for sports hall layouts:

- Manufactured from heavy duty aluminium enclosed trackway
- Conforms to BS 1892 section 2.11 1989
- Spans up to 6 metres without the need for any secondary supports
- Crossover units and 600mm radius curves allow maximum flexibility in hall layouts
- Crossover units are static, with no moving parts to wear
- Quality extruded trackway curves to ensure no sagging nets
- Unique trackway trolleys with quality fittings
- No tying line or pulley system required
- Supplied with PVC, fire retardant storage bags

## REBOUND BOARDS

We supply Sportsafe UK mobile division boards (Patent Pending). Available in the widest range of colours to complement any sports hall, these "wheel-away" boards interlock to form a solid wall in any configuration. Furthermore, their unique design means that no floor sockets are required and rigidity is assured.

Standard boards are 2500mm (wide) by 1200mm (high) and are side and top finished in laminate, painted MDF or, for outdoor use, marine ply. They move on heavy duty wheel fittings. A tray is fitted to the top to hold and protect netting when the boards are in use. Variations in size and gate board options are available as special made-to-measure units **POA**  
Our designers can discuss detail and dimensions with you prior to quotation for special boards.

The mobile boards stow away compactly and are easily handled by one person. They can be erected and dismantled in minutes!

## FLOOR PLUGS

Complete with flush fitting spring return plunger to secure T style bolts. Ideal for securing volleyball, tennis or netball posts and professionally installed by our engineers.
